BARREL AGING

19 MONTHS IN EUROPEAN OAK; 30% NEW OAK

DRY CREEK VALLEY CABERNET SAUVIGNON  
IS AN UNDISCOVERED GEM

- A perfect microclimate with long days of vibrant sunshine and cool, foggy evenings allows for exquisitely ripened Cabernet Sauvignon grapes.
- Iron-rich soils of the western hills are thin and rocky, creating a stressed environment in which to grow grapes with bold, intense flavors.
- With bright cherry fruit framed by floral and spice elements, this wine speaks to the distinctive soil and growing conditions of the Dry Creek Valley.
